

Hotei Energy B.V. (HE)

Cryptocurrencies in energy services.

WhitePaper

November 11th, 2020.

Version 1.0

Abstract

Hotei Energy B.V. ("HE"), is the first offshore & outsourcing energy services company, their operating and investment capital is created from the global crypto market, thanks to the participation of small and big investors in the digital market, which they looking for create periodic earnings from legal and real activities. This company is focused on provide services of excellence and quality for the energy sector, initially focused for the oil & gas sector with a open view to providing solutions and services for the development, sustenance and maintenance of clean and renewable energies around the world, using blockchain technology, artificial intelligence, standards, certificates and international norms to position the brand among the firstable world service companies and thus monitor operations globally in real time. HE offers its users the possibility of enjoying rewards generated by the company, through the purchase of company participation tokens through the acquisition of a private token called ("HE"), from which, they are made the calculations for the payment of dividends from the monthly billing earnings accrued by the company for the services offered around the world. There is a finite number of HE tokens, the volume of investor participation being limited; HE purchase process is done via ETH, BTC and USDT exclusively after passing user data verification (KYC). Participation tokens can be sold after the established periods, once the participant so manifests, thus withdrawing the initial value invested and dividends generated during the notification period.

- Integrity: we follow a strict line of action and shared responsibility between what we say, what we think and what we do.

TROUBLE

The crypto world has so far been fertile ground for scams around the world, due to the general ignorance of users on many matters inherent to cryptocurrencies, many websites offers high returns in short time through web portals services of few reliability and transparency through, without any face or person in charge, reaching that many Internet users have managed to qualify cryptocurrencies such as Bitcoin as scams, without knowing how to find differences between unscrupulous initiatives and legitimate projects.

The most common elements that tend to be found in these unscrupulous initiatives are, excessive publicity, vaguely described projects, exaggerated returns in a short time, anonymous administrators, mining of crypto assets in the cloud, fictitious smart contracts, fake exchange platforms, pyramid schemes of referrals, phishing, among others.

SOLUTIONS

Hotei Energy B.V. understands the high potential of the global crypto market, and uses it as an impulse to offer solutions, employment, services and real returns to our investors from a real business, based on the offer towards the most lucrative industry in this world, energy industry, based on the following premises:

- Visible faces: we are real people with more than 10 years of experience and extensive professional and academic background in different areas.
- International legal framework: we offer real contracts based on international law.
- Legal funds: we will provide to our subscribers a agreement detailing the regulatory framework and the spectrum of action of their investment. We make up our capital, coming from people who do not have legal antecedents

local and internationally, we totally dissociate ourselves from illegal activities (scams, terrorism, corruption, drug trafficking and money laundering), regularly we will publish to the authorities our account statements and origin of funds, in order to communicate security, legality and transparency of our capital.

- Organization: we have a solid organization structure, regulation of all our processes, based on international norms and standards.
- No referrals / No pyramid scheme: we do not promote any type of scam or misleading offers through our official channels, we offer assistance and advice for anyone who requests us to perform a risk analysis based on their investment.
- Total and voluntary exit shareholding: we offer our users the possibility of withdrawing their capital whenever they want, after the established periods have elapsed.
- Blockchain, WITSML: we promote the integration between Blockchain technologies and the WITSML standard to have a global spectrum of our services and performance over the world.
- Contacts: We have a wide network of professional contacts in the energy market around the world.
- Presence and operability: Hotei Energy B.V. is spread around the world and it has offices where each user can validate and attest that we are a real company of global scale.
- References: you can locate our managerial and technical staff through official channels and social networks, in order to consult them about us and what we do.
- Values: we follow a strict ethical line, which exalts the most authentic principles of sincerity, commitment, security, transparency and love for our vocation of service, which is energy development.
- Communication: we will be in constant communication with our clients through the different digital platforms and official accounts of the company to clarify and solve any doubt or incident that may arise during the process.

- Commitment: we have the strongest conviction that we will be able to exceed the initially goals set because the energy business is the best business in the world particularly the oil, the business of this raw material is in services.
- Service vocation: we love our profession and what we do, we are very good at it; we want to serve as a bridge to offer the world the benefits of a real business by which we believe a better world is possible.
- Real profits: Hotei Energy B.V. offers to their investors the possibility of accruing real and legal profits from the billing of services offered around the world.

¿WHY Hotei Energy B.V.?

Investing in a world-scale energy services company requires having a strong economic capital and carrying out cumbersome procedures in banking entities that greatly limit the access for most people for this market and for which no further return is obtained than the variation in the value of the company's commodity.

A large part of digital investments in crypto assets lend themselves to scams, fraud and capital losses over time, because most internet portals and digital businesses do not have representation, do not have a legal framework or security directives. In their platform, they speculate and do not generate any real assets or service, therefore their actors use this ignorance to offer misleading offers and get hold of other people's capital, thus damaging the patrimony of users.

Hotei Energy B.V. is conceived to receive a limited volume of small, medium and large investors in the digital market to form their investment capital, where those who want to generate real profits, they will be able to achieve it through the monthly billing services that the company offers to the energy industry around the world, their participants will have the possibility of accruing real and stable profits as long as they have a stake in the company and wish to retain this privilege.

Hotei Energy B.V. is a leading and avant-garde company in the energy market that comes to compete with service companies on a global scale, has solid foundations in its different locations around the world, which allows it to establish itself as a solution in the energy market and to be a reference in the sector, giving all interested people the possibility of participating and being part of its work force for the collaborative achievement of economic and labor growth that the world requires today.

PRE-SALE Hotei Energy B.V.

The presale contemplates the public settlement of a private token of participation called (HES), non-mineable and with a finite volume of ten million tokens (10,000,000 HES), each HES during the presale will have the value of one US dollar (1 USD), it would go into public offering through the official page of Hotei Energy B.V., it can be purchased through USDT, ETH and BTC exclusively.
